## PROFILE

Full stack web developer and motivated student with great problem solving skill, eager to tackle real-world challenges. I thrive in collaborative environments and enjoy working with inspired teams to achieve tangible results.

## EDUCATION

### **Bachelor of Computer Science**

*Addis Ababa University (4kilo campus)*

Third year student with comprehensive degree in Computer Science, developing programming and problem solving skills. Passionate about maths.

### **Web Development and Data Structure and Algorithm**

*Freecode Camp (virtual education)*

Solid foundation in web development. Learned JavaScript, Data Structure and Algorithm and Responsive Web Design. Completed more than 10 projects, spend more than 300 hr each.

## PROJECTS

### **Electronic-Food**

- Developed user friendly food ordering app that have add cart, order, notification, report food features. It have also real time update that shows Food status.
- Easy to use and make communication clear between customer and hotel waitors.
- Analyse report of how many food sold in a day, week and month.

### **Personal Information Management System**

- Developed a web application temple for a group that a user can register and edit his/her profile, see his/her friends profile.
- Used CRUD operation with Postgresql for data base management

## SKILLS

**Front End Development Skill** (with React JS, Vue js, Next js, Nuxt js and TailWind )

**Back End Development** (with node js and express js, currently learning go)

**Data Bases Management skill**(with PostgreSQL)

**Comfortable with Programming Languages** ( Java, Python, JavaScript, C++)

## PARTICIPATION

### **Member at A2SV Community**

*(both virtual and inperson ) June, 2024- now*

Learned Advanced Data Strucuture (such as, Greedy, Tree, Dynamic Programming, Linked List, Backtracking and other algorithms). Motivated in community I solved more than 500+ leetcode and codeforce problems. I also developed communication skill with team.
